REPORT OF THE STATE BOARD OF TAX COMMISSIONERS.

To the General Assembly of the State of Indiana :

GENTLEMEN—The State Board of Tax Commissioners, complying with the provisions of the law relating to taxation, presents for your consideration and information this, its third biennial, report.

Since submitting its report of 1895, the Supreme Court of the United States has sustained the validity of the Indiana tax law by affirming the decision of the Supreme Court on the appeal of the Western Union Telegraph Company. The decision is in line with the one previously handed down in the railway tax cases, by which \$160,000,000 of corporate taxable property was placed on the duplicates of the different counties and is a stalwart vindication of the integrity and justness of the tax law of our State. Experience the impression deeper makes that Indiana does not follow, but leads, in fidelity to the great principle that should underlie the provisions of raising revenue by taxation, that of "equal and exact justice to all." To discriminate against associated capital or corporate investments because of moneyed strength, would be as vicious as to increase unduly the weight of burden upon the humbler class of producers by overvaluations.

The theory of the Indiana tax law is that all appraisements from every source should bear as conservative and relative proportion to actual values as good business judgment would dictate, and that every dollar of taxable property, personal or corporate, should on the tax duplicate be on an equality in contributing to the expenses of government.

We would renew our suggestions made in the last biennial report, that the date of assessment be fixed on the first of March, instead of April 1, thus starting the machinery of tax

PP1200

listing one month earlier, and there should be a uniformity in the dates of paying taxes before the same became delinquent.

The delinquency in collection of taxes during the past year has amounted to about 10 per cent. This is altogether too much, and impairs the revenues as estimated by the General Assembly in making appropriations. The allowance to County Treasurers of 4 per cent. for the collection of delinquent taxes does not inspire them to put forward the efforts to make collections, as if the fees were larger. We would recommend the rate be increased to 6 per cent. There is always an extra expense incurred in making collections of delinquencies, and unless the reimbursement by the State makes it an object, the State and county loses through lack of a searching effort to realize from the property of delinquents.

The last day for the payment of the spring, or first installment of taxes, is the third Monday in April, while the last day for the second, or fall installment, is the first Monday in November. The change to uniform Mondays would prevent confusion, and result in a decrease of delinquent taxes. There should be more stalwart measures enacted, looking to the listing of sequestered property. The law taxing greenbacks corrected a custom that, while not general, was far from sporadic, of money on hands being converted into this form of exempted property. The personal valuation of Indiana is not all approximately on the duplicate. Notes, bonds, mortgages, and money on hands, are classes of property that escape the assessor's enumeration in very considerable amounts, because of omissions in making proper and correct returns through evasion from different causes, by many persons. Penalties should be more drastic when returns are willfully withheld or misrepresented, and officers charged with assessments should be allowed liberal costs where frauds are detected. There is more or less of a cloud surrounding what should be considered as "bona-fide indebtedness," so much so that officers find it difficult in placing a construction that will be uniform in its effect. It trenches on the credit system so closely, that improper deductions might reduce aggregate valuations. The law should be strictly construed and this loop-hole closed. Amendments could and should be enacted giving a more explicit interpretation of the scope of this exemption. And so in the matter of

building and loan association stock. No class of property has aroused such a wide contention as to its relation to assessment. The theory of building and loan associations is semi-philanthropic, in that it originally sought to foster and develop habits of thrift, frugality and economy, by husbanding savings and increase the ownership of homes among those in more humble circumstances. There is more or less of splendid philanthropy in associating monthly savings for mutual benefit, so that in the life of an organization thus formed, the rents a borrower would pay, if placed in the treasury of the society, would enable a home to be paid for, and standing room in life's struggle a matter of personal ownership.

Up to this point, so far as building association stock is concerned, it is classified as "running stock," and is exempt from taxation. The popularity of building associations in attracting borrowers, whose circumstances were such that monthly repayments were more convenient, has led to organizations with a widely extended compass of operations, and investors and stockholders who are not inspired by the beneficiary features of the original associations. Investments thus made are with a view to the profit accruing from the better rate of interest obtained, and so the taxing officers hold that "paid-up" or "prepaid" stock is taxable.

With the development and increase of these speculative associations, complex questions are liable to arise, and a more comprehensive statute should be enacted embracing all the varied forms of stock, and specific rulings as to taxable qualities.

Should the decision of the United States Supreme Court in the cases of the Express Companies on appeal, be affirmed, as were the appeals of the Railroads, and the Western Union Telegraph Company, then all contentions of consequence with corporate properties will have been finally settled, and the position of this Board, in its faithful adherence to the provisions of our most excellent Tax Law fully vindicated. Although the business depression has been specially severe on the railway companies of the country, it is gratifying to report but a very slight amount of delinquent taxes from this source. Corporate capital is the heaviest tax-payer in Indiana, and is one of the most prompt.

Inestimable benefit would accrue from a general conference of county assessors, previous to engaging in their labors. Uni-

formity of action, broader knowledge of taxables and taxation, and a more practical general familiarity with duties would result. We can not too strongly recommend an official requirement of annual conventions of the County Assessors of the State.

By reference to the tabulated statement of this report, an exhaustive elaboration of the taxes paid into the Treasury by funds and by counties will be found, as well as a comprehensive marshalling of the rate of taxation in each township and county in the State, and also the indebtedness of each county in the State with rate of interest paid.

From the general and benevolent institution funds, the expenses of State Government, as appropriated for by the Legislature are paid. It will be seen that the accretions of these funds were \$1,614,462.76; the receipts from other sources were \$434,358.02. In this latter amount are credited \$156,220.86 paid by the Auditor of State from fees collected off of insurance companies; \$30,137.40 paid by the Secretary of State on incorporation and other fees; \$5,666.11 paid by the Clerk of the Supreme Court; \$126,609.24 paid by the prisons; and the balance from benevolent and reformatory institutions and other incidental sources. Until the present general business depression shall have passed away, it can hardly be presumed that the total taxables of the State will be materially increased. They are now \$1,286,050,531. Our resources from fees and corporation taxes are affected by a like cause, and hence the present aggregate receipts are at a maximum for the immediate future.

No State in the Union derives as large a revenue from its insurance department with the very slight expenses, as Indiana, and outside of taxes it is the next substantial source of income. The prisons are rapidly becoming self supporting. The Government pays about four-fifths of the expenses of the Soldiers' Home at LaFayette, while the benevolent institutions and reformatories with their splendid management turn back into the Treasury comfortable amounts as industrial proceeds. This diversion is to epitomize the business management that is being exerted in the interest of economy by every arm of State government.

The taxes accruing to the State Debt Sinking Fund during the year were \$376,629.07. There was on hand in this fund

at commencement of year, \$231,192.67. The State debt has been reduced during the year, \$800,000: March 2, 1896, \$300,000, three and one-half per cent. bonds; April 1, 1896, \$100,000, three per cent. bonds; August 1, \$200,000, three per cent. bonds; December 18, 1896, \$200,000, three per cent. bonds, thereby reducing also the annual interest \$25,500. This showing demonstrates that our taxes and revenues are producing practical results touching the individual betterment of each tax-payer, and, while lifting the burdens of debt from the State, is rapidly placing Indiana's financial standing in a pre-eminent position among the model commonwealths of the Republic.

The embarrassing conditions surrounding an individual in debt are equally applicable to the State. Corporate and private investment in manufacturing enterprises have begun to take advantage of our natural gas resources, and, in time, that portion of our State favored with these great lakes of nature's wonderful fuel will be in itself an industrial world.

As an added inducement, no more welcome hand can be extended than a State comparatively free from bonded obligations and interest charges, and a tax rate that reflects careful business management in public expenses. The levies for State purposes are now very low—at a minimum. The expenses of State government are approximately \$2,000,000 annually.

Without the statutory or extraordinary appropriations, the rate as now fixed upon present valuations, will yield approximately \$2,300,000, so that it will be readily observed the margin, after providing for the fixed appropriations, can not be very material. Should a surplus accrue it can and will be applied in paying the optional bonds, and so your Commission do not conclude it is prudent to recommend any reduction in levies for State purposes.

With such an admirable tax law, a financial showing so superb, and a State so prolific of all the natural resources that enter into the desideratums of the more substantial manufacturing interests, Indiana has certainly ample cause for self-congratulation, and can look confidently for a future of unprecedented prosperity.

In compliance with the provisions of the law, there is submitted herewith a statement showing the amount of taxes of each kind collected during the year 1896, and also the delinquent taxes collected during that period. The collection of corpora-

tion taxes does not represent the entire collections on this account, for the reason that the larger portion of these taxes are collected by city and town treasurers, and there is no provision of law requiring these officers to report their collections. The law should be so amended that the Board of Tax Commissioners could require reports from these officers. The collections shown for the counties of Howard and Madison include the December collections for 1895, for the reason that the December settlement of 1896 had not been made with the State in time for this report. No collections are shown for Carroll County, for the reason that said county has failed to settle with the State for 1896 collections.

There is also given with this report a statement showing the amount of taxes levied in each township in this State. In this statement the series for State purposes is not shown, but are included in the totals.

Tabular Statement Showing the Net Collections of Taxes of all Kinds for the Year 1895, in the Several Counties of the State as Shown by the May and December Settlements of 1896.

THE STATE OF INDIANA,
EXECUTIVE DEPARTMENT,
January 16, 1903. }

Received by the Governor, examined and referred to the Auditor of State for verification of the financial statement.

OFFICE OF AUDITOR OF STATE,
INDIANAPOLIS, January 16, 1903. }

The within report, so far as the same relates to moneys drawn from the State Treasury, has been examined and found correct.

W. H. HART,
Auditor of State.

JANUARY 16, 1903.

Returned by the Auditor of State, with above certificate, and transmitted to Secretary of State for publication, upon the order of the Board of Commissioners of Public Printing and Binding.

CHAS. E. WILSON,
Private Secretary.

Filed in the office of the Secretary of State of the State of Indiana, January 16, 1903.

UNION B. HUNT,
Secretary of State.

Received the within report and delivered to the printer this 16th day of January, 1903.

THOS. J. CARTER,
Clerk Printing Bureau.

REPORT OF THE STATE BOARD OF TAX COMMISSIONERS.

OFFICE OF THE STATE BOARD OF
TAX COMMISSIONERS OF INDIANA.

To the General Assembly of Indiana:

GENTLEMEN—In obedience to law, the State Board of Tax Commissioners begs leave to submit the following:

The two years covered by this report have presented to the Board duties of the regular order as prescribed by the laws governing the work of the Board, and the results of the Board's labors have been set out in the report of its regular annual sessions. Detailed reports at this time are, therefore, considered unnecessary.

During the last two years, it has been the chiefest aim of the Board to obtain a more just and equitable listing of the personal property of the State. There having been no real estate assessment, all of the time could be, and has been given to the ascertainment and assessment of the great body of property, much of it intangible and hidden, that enriches the land and our citizens, and yet in great measure denies to the State and County its proportionate burden of the expenses of government. This is the difficult problem in taxation. The tangible property that can be described by metes and bounds, its ownership accurately and surely established, the location and condition of which are known to all, cannot escape the duplicate. It is the first assessed, and once assessed, it never disappears from the duplicates. The whole question in its assessment is its valuation. And this to conscientious and painstaking officers, becomes a matter of calculation. As to such property, the Board feels that it can truly say that it was at the last regular assessment, placed upon the duplicate at a fair cash value. During the years since that assessment, real estate has increased in value, and today there is a discrepancy between value and

assessment. But, in a rapidly developing State, such as ours, where values rise constantly and rapidly, this must ever be the case, when such property is assessed at intervals of four years. During the last four years, the values of farm property, and in most cases, of city property, have largely increased, and in consequence the duplicates will be largely augmented by the assessments to be made this year. It can not be estimated how much of an increase from this source may be expected, but it will be large—very large. The laws governing the assessment of this kind of property are ample, and insure a fair valuation.

In the assessment of personal property, uniformity of effort and equalization of values have been the aims. Through the medium of the Conference Convention of County Assessors with the State Board of Tax Commissioners, the Board has undertaken to reach every township assessor, and in this way, obtain systematic effort toward the discovery of hidden property, and the listing of all personal property at a fair and equal cash value. These County Assessors' Conventions have been closely followed up by district meetings of County Assessors, and county meetings of Township Assessors, at all of which meetings, one of the Tax Commissioners has been present. In this way, every assessing officer has been reached, and perfect plans of action inaugurated and executed. The result has been a very large increase in the personal property of the State. The personal property upon the duplicate in 1899, was \$318,942,386. This was increased in 1900 to \$332,857,739, and in 1901 to \$340,068,098, while for the year 1902, incomplete returns show it to have been increased to \$354,337,093, or an increase in three years of over eleven per cent. This is a record worthy of our State, its laws and its officers, and is the best possible step towards the relief of the tax payers of our State. For, as the tax bearers increase in numbers, and the assessment of property becomes more uniform and perfect, the burden to each particular piece of property becomes less. The theory of our law demands the assessment of every piece of property, and of all value at its true cash worth and in return for this, promises a low rate of taxation and burdens distributed to, and falling lightly upon all.

The property coming directly under the power of the Board has increased in extent, and during the last few years

and in line therewith, the valuations by the Board have increased. The valuations of 1890 and 1902 are as follows:

<i>Railroads.</i>	<i>1890.</i>	<i>1902.</i>	<i>Increase.</i>
Main Track.....	\$123,004,545	\$128,698,490	\$5,693,945
Second Main Track.....	3,636,835	4,958,920	1,322,085
Side Track.....	8,115,345	8,811,735	696,390
Rolling Stock.....	16,514,906	17,056,542	541,636
Improvements on Right of Way.....	3,003,500	3,272,300	268,800
Total Railroad.....	\$154,215,131	\$162,797,987	\$8,522,856
Telephone Companies.....		\$5,043,579	
Express Companies.....	\$1,816,345	2,055,981	
Telegraph Companies.....	2,513,692	2,478,163	
Palace Car Companies.....	432,598	437,649	

1903
 128,942,550
 5,648,410
 9,412,785
 17,402,305
 3,404,305
 164,835,091

To the above assessments for 1902, there should be added the assessments made against fast freight lines, electric car companies, and pipe lines, as provided for by the last General Assembly. The assessments for 1902 upon these properties were as follows:

Pipe Line Companies.....	\$8,195,554
Electric Street Car Companies.....	9,639,312
Fast Freight Lines.....	409,000

This class of corporate property is increasing very largely every year, and it is fair to predict, will increase largely its share of public burdens during the next few years.

A third of the time of the annual session of the Board is consumed in hearing appeals from the county Boards of Review. This part of the work of the Board grows every year, and the time allotted is so short that it compels the Board to work vigorously and be in session all of the time. The last year very many appeals were heard, and the consideration of millions of dollars' worth of property had. There can be little doubt but that much property would be added to the duplicate, could the assessments of the property reach this Board through these appeals.

The returns of the county auditors to the Auditor of State show a remarkably good collection of taxes during the year. People are looking more carefully to this duty every year, and saving themselves the embarrassment of the penalty upon, and the advertisement of their property for tax sale, by paying up promptly, and thus giving the money at once to the purpose for which it was assessed. There still remains a great burden

to the duplicates in the thousands of small amounts that are allowed to go delinquent, and for which there seems no property at hand upon which levy may be made to force collection. Every year tens of thousands of dollars are carried to the worthless tax registers, because they can not be collected. These taxes are in a great measure against able-bodied young men, who enjoy all the privileges of citizenship, share in the blessings that good government, supported by taxes, affords, but who do not in any way contribute to its support. This is wrong, and some way should be found to force collection. While not over seven per cent. of the taxes assessed against property remains uncollected, over 35 per cent. of the poll taxes assessed are carried to the insolvent and worthless tax duplicate. This is disgraceful, and we believe the rights of such men to suffrage at the polls should be denied them.

The tax levies of the State show some decline, but not as much as should be. We renew our recommendation that there be a limit fixed to the rate upon every hundred dollars that a county or township may levy for the payment of all its expenses.

The Board hesitates to propose changes in the laws of the State, but feels that for the good of the State a few are necessary, and it therefore respectfully recommends the following, and urges their formulation into law.

1. That the act of the Legislature of 1901, providing for the assessment of fast freight lines be amended by striking out the provision for a tax on each mile, and placing in lieu thereof, a provision for charging a fee for each car operated within the State—this fee to be paid into the State Treasury, and be a part of the income of the State for its support.

As it stands to-day, the law is practically inoperative. The large mileage traveled by the cars compels so low a rate per mile that there results a very small assessment in each township, and the tax resulting is so very small it can not be collected.

2. That the assessment period begin March 1st instead of April 1st, and that all property be listed with reference to its quantity and quality held or owned on the first day of March in the year for which the property is required to be listed; that property be listed between the first day of March and the

fifteenth day of May, and that township assessors make their returns on or before the fifteenth day of May; that the Boards of Review of the counties shall meet on the first Monday in June and continue in session for thirty-five days, in years when real estate is not assessed, and forty-five days in the years when real estate is assessed, providing that the Board may adjourn finally at any date short of these days, if it is found that the time is not necessary, and after notice of five days has been given.

The object of this change is to give the township assessors and the Boards of Review more time. As it is, the assessors in the larger townships of the State do not have the time necessary to a thorough and intelligent assessment of the property under their jurisdiction. The work is done hurriedly, and without personal knowledge in many cases. The change also gives the Boards of Review more time in which to value the property before it, and equalize the valuations that come to it from the township assessors. It is not made mandatory that Boards remain in session, but the right is given. From this would result a fairer and truer equalization of property.

3. That building and loan associations be required to furnish the county auditors a list of their stockholders.

This would enable the authorities to reach all stockholders of the companies and place them upon the books, as are the stockholders of banks.

4. That the law providing for the assessment of banks be so amended as to include trust companies, and that said companies be required to make the same reports as do banks, and that they be assessed upon the same basis, and in the same manner.

There is no law providing specifically for the assessment of these companies. It is thought best that a uniform law be passed, and that they be assessed, as are their sister organizations—the banks.

1909-1910

THE STATE OF INDIANA,
EXECUTIVE DEPARTMENT,
December 1, 1910.

Received by the Governor, examined and referred to the Auditor of State for verification of the financial statement.

OFFICE OF AUDITOR OF STATE,
INDIANAPOLIS, December 1, 1910.

The within report, so far as the same relates to moneys drawn from the State Treasury, has been examined and found correct.

W. H. O'BRIEN,
Auditor of State.

DECEMBER 1, 1910.

Returned by the Auditor of State, with above certificate, and transmitted to Secretary of State for publication, upon the order of the Board of Commissioners of Public Printing and Binding.

MARK THISTLETHWAITE,
Secretary to the Governor.

Filed in the office of the Secretary of State of the State of Indiana, December 1, 1910.

L. G. ELLINGHAM,
Secretary of State.

Received the within report and delivered to the printer, December 1, 1910.

A. E. BUTLER,
Clerk Printing Board.

REPORT OF THE STATE BOARD OF TAX COMMISSIONERS

TO THE
SIXTY-SEVENTH GENERAL ASSEMBLY OF THE
STATE OF INDIANA.

OFFICE OF THE STATE BOARD OF TAX COMMISSIONERS OF INDIANA.

To the Sixty-seventh General Assembly of the State of Indiana:

In compliance with the law the State Board of Tax Commissioners of Indiana submits this biennial report.

We are required "to report to you the whole amount of revenue collected in the State for all purposes, classifying as to State, county, township and municipal purposes, with the sources thereof, the amount lost, and the causes thereof, the proceedings of the Board, and such other matters of information concerning the public revenues as we may deem of public interest."

This report is made to each legislature, and as we interpret the statute, covers the period of two years and the statements and comparisons should be made accordingly, but we append hereto and make a part hereof a statement for the year 1910 only, and the statement for 1909 is omitted. We do this because, in our opinion, it would not be wise economy to put the State to the expense of printing an extended tabulated statement of the year 1909, when for all your purposes the statement of 1910 will fully serve.

We give you for the last year the total collection of all taxes, by funds, as shown by the May and December settlements. We also submit an abstract by counties showing the total taxable property of the State, real and personal, including railroad and other corporate property assessed by us, together with the amount of taxes levied thereon for State and local purposes, and also the number of taxable polls in the several counties of the State for the year 1910.

We also append a tabular statement showing the levies by townships on each one hundred dollars of taxable property, as computed for the year 1910, and including poll taxes.

The facts shown by these statements will enable you to form a reasonably accurate estimate as to the amount to be levied by you in cases where the law requires you to make levies, and this we take it is the main purpose of the law which requires us to make such a report.

If it shall be determined by the Legislature to be necessary to have a similar report for the year 1909, and that the expense of printing the same can be justified, we will be ready to supplement this report by similar tabulated statements for that year and place the same in your hands without any delay, excepting only the delay necessary to have the same printed. And we further suggest that the annual report of the Auditor of State for the year 1909 will aid you in making any comparisons that you may need to make with that fiscal year.

As to any losses shown therein we cannot with any accuracy state the causes; what are shown will appear to be the ordinary causes of failure to collect, and the delinquent taxes seem to be growing less each year. School revenues seem to be not included in the statute. We apprehend an appreciable loss in the next year, arising from the fact that the Supreme Court has decided that there is no power anywhere to employ persons to place omitted and sequestered property upon the duplicate, unless the property so omitted or sequestered is located outside of the county in which the taxpayer resides, and for this reason those so heretofore engaged have abandoned that work.

We believe that laws should be enacted with proper and reasonable restrictions which would enable this Board to make legal contracts for the collection of taxes upon all omitted and sequestered property, or to make it legal for other officers to make such contracts to be approved by this Board, and in no case should the compensation exceed the sum of 15 per cent. of the moneys thus collected, and not in any case to be paid until the money is collected, and such persons so engaged should be put under bond for the faithful and honest execution of their contracts.

We recommend and strongly urge the repeal of the Act of February 24, 1905, which exempts the property of Greek letter fraternities from taxation. These organizations are in no sense charitable, religious or educational, but are social only, and there is no good reason why the property of such associations should be exempt from taxation. In some communities this exemption adds greatly to the burden to be borne by other property and is unjust from every point of view.

In our opinion, those who hold promissory notes or other evidences of indebtedness, should be required to present them to the assessor to be assessed, and the listing officer, each year, should be required to indorse upon such the fact that they have been listed for taxation, and it should be provided by law that such claims could not be collected until so indorsed and all back taxes thereon paid.

Individuals and corporations are assessed with what is known as, and called road tax, and such taxes are intended for the improvement of the highways. It is also provided by law that such taxes may be worked out by the taxpayer, under the direction of the township trustee, at a compensation fixed by the statute. This law has been regarded as being beneficial to the individual taxpayer, and especially to the farmer, as it gives him an opportunity to put in his spare time in working upon the roads, but it has been grossly abused by the railroad corporations. They sublet to others the working out of these taxes and in many cases there is another subletting, so that third parties do the work for not much more than half of the amount of the original tax assessed against the railroad company, and thus the people of the road district, in almost every instance, do not get the benefit of much more, and in many cases, not any more than half of the tax so assessed against the corporation.

A law which would give the individual the right to work out his road tax, and deny it to the corporation, would probably be invalid as being class legislation. So that the only remedy for this great abuse seems to be the repeal of all laws authorizing the working out of road tax, and making that tax as all others are, payable in money only.

Dissatisfaction, as well as criticism, has come under the observation of the State Tax Board as to the manner in which stock held in banks and trust companies is assessed.

Under the present law the Board of Review in the county where the banks or trust companies are located assess this stock. The board in one county will assess the stock of the bank or trust company located in its county at 65 per cent. or 70 per cent. on the dollar, based upon the capital, surplus and undivided profits, while in an adjoining county the board will place the valuation on the same basis at 85 per cent. or 90 per cent. The banker who has been assessed at a higher valuation (everything being equal) than the banker in the neighboring county, immediately complains of being treated unfairly and unjustly by the Board of Review of his county,

and as a remedy appeals to the State Board of Tax Commissioners for relief, as did Boone County bankers last July, while in the county where the assessment is made at a lower valuation than the county adjoining the banker makes no complaint, but the honest taxpayer steps in and makes complaint that the Board of Review of his county is favoring the banks and trust companies and compelling him to bear the burden of taxation. The result is we now have 92 boards to assess the banks and trust companies throughout the State, which amounts to no uniformity whatever in the assessment of this class of property.

There have been several suggestions as to the best manner of assessing such institutions, but after considering the matter, it is our opinion that if banks and trust companies were classified according to their capital, surplus, deposits and earning power, as well as the volume of business done, for taxation purposes, and placed under the jurisdiction of the State Board of Tax Commissioners, to be assessed along the same lines as they assess other corporate property, there would be a more equal and uniform valuation placed against such companies for taxation purposes.

The issuing of stock and bonds by municipal corporations should be controlled by law so as to prevent frauds upon the public and imposition upon investors.

The Secretary of State is ex officio a member of this Board, and has in charge in his office such matters pertaining to corporations, but the responsibility of determining how much stock, or how much in bonds a municipal corporation should be allowed to issue, is one that one person would not care to assume. In view of these facts we suggest that a law should be enacted that would give this Board the power to determine such matters and that no issuance of stock or bonds by such corporations should be legal until approved by this Board. This, we believe, would tend to prevent fraud and protect the public and conserve the interests of all concerned and be a proper regulation of a domestic corporation.

The recommendations as to legislation which are made herein have been made with the express consent of the Chief Executive of the State, and we think with his concurrence. However, they all relate to matters concerning the public revenues, and to give the legislature such information is a part of the duty laid upon this Board.

The proceedings of this Board in detail, showing the assessments made, may be found in its annual reports to the Governor. copies of which are herewith transmitted.

As required by law, the county assessors are called into an annual conference each year. These meetings are held in the Capitol building, and as soon as they are adjourned are followed by meetings in each county of the township assessors, at which one member of this Board attends, for the purpose of giving instructions to such officers in relation to their duties. We need not inform you that all citizens are interested in the matter of taxation, but we desire to state that this Board has taken pains to promote and increase this interest upon the part of the taxpayer, and has requested that all classes of taxpayers be invited to these annual meetings, which occur during the first two months of the calendar year and are held at the county seats; and from the private citizen, as well as from the taxing officers, many valuable suggestions are received there, some of which have led to the recommendations we have incorporated in this report.

Considered generally, the public revenues of the State seem to be in a satisfactory condition. They are sufficient to sustain our state, school and municipal establishments.

The tax law of 1891 is now, and has been ever since its enactment, regarded as a model and has been copied by several of the other States, recently by the State of West Virginia. It has stood the test of all the courts where its validity could be tried.

The suggestions we make would tend to make a better administration of it, and help to carry out the purposes of the original framers of the statute.

Respectfully submitted,

JOHN W. McARDLE,
FRED L. GEMMER,
C. C. MATSON,
State Tax Commissioners.

THE STATE OF INDIANA,
EXECUTIVE DEPARTMENT,
November 18, 1912.

Received by the Governor, examined and referred to the Auditor of State for verification of the financial statement.

21 July 22 - MFD

OFFICE OF AUDITOR OF STATE,
INDIANAPOLIS, November 18, 1912.

The within report, so far as the same relates to moneys drawn from the State Treasury, has been examined and found correct.

W. H. O'BRIEN,
Auditor of State.

NOVEMBER 18, 1912.

Returned by the Auditor of State, with above certificate, and transmitted to Secretary of State for publication, upon the order of the Board of Commissioners of Public Printing and Binding.

MARK THISTLETHWAITE,
Secretary to the Governor.

Filed in the office of the Secretary of State of the State of Indiana, November 18, 1912.

L. G. ELLINGHAM,
Secretary of State.

Received the within report and delivered to the printer November 18, 1912.

ED D. DONNELL,
Clerk Printing Board.

DUTIES OF THE STATE BOARD OF TAX COMMISSIONERS.

(Acts 1891 p. 199—Sec. 178 Tax Laws.)

178. DUTIES OF STATE BOARD :

It shall be the duty of the State Board of Tax Commissioners :

First. To prescribe all forms of books and blanks used in the assessment and collection of taxes, and to change such forms when prescribed by law, in case any such change shall be necessary.

Second. To construe the tax and revenue laws of the State and instruct them in relation to their duties with reference to taxation and assessment, whenever requested so to do by any officer acting under any such laws, or by any other person interested therein.

Third. To see that all assessments of property in this State are made according to law.

Fourth. Especially to see that all the railroads and other corporations of the State are assessed and taxed as provided by law.

Fifth. To see that all taxes due the State are collected.

Sixth. To enforce penalties prescribed by any revenue law of the State for disobedience of its provisions.

Seventh. To determine, whenever necessary, the amount required to be levied upon property in the several counties to cover any deficiency in the State revenues, not otherwise provided for.

Eighth. To examine all books, papers and accounts, and to interrogate under oath, or otherwise, all persons necessary to enable the board to acquire and obtain all information that could in any manner aid it in securing a compliance with the tax and revenue laws of the State by all persons or corporations liable to taxation, or to pay any license fee under any law in force in this State.

Ninth. To make such rules and regulations as the board shall deem proper to effectually carry out the purposes for which the board is constituted, and to make all necessary rules and regula-

tions not inconsistent with law, as the board may deem necessary with respect to its own meetings and procedure.

Tenth. To report to the General Assembly, at each session, the whole amount of revenue collected in the State for all purposes, classifying as to State, county, township and municipal purposes, with the sources thereof, the amount lost and causes of the loss, the proceedings of the board, and such other matters of information concerning the public revenues, as they may deem of public interest.

Eleventh. To make diligent investigation and inquiry concerning the revenue laws and systems of other States and countries, as far as the same are made known by published reports, or statistics, or can be ascertained by correspondence with officers thereof, and with the aid of information thus obtained, together with experience and observation of our own laws, to recommend to the General Assembly at each session thereof, such amendments, changes or modifications of our revenue laws as seem proper or necessary to remedy injustice or irregularity in taxation, or to facilitate the assessment and collection of public revenues.

Twelfth. To see that each county in the State be visited by at least one member of the board, as often as once each year, to the end that complaints concerning the law may be heard, and that information concerning its workings may be collected. That all revenue officers comply with the law, and all violations thereof be punished, and that all proper suggestions as to amendments and changes may be made. (3 Burns R. S. 1908, Sec. 10291.)

OFFICE OF THE STATE BOARD OF TAX COMMISSIONERS,

INDIANAPOLIS, December 1, 1912.

To the Sixty-Eighth General Assembly of the State of Indiana:

The State Board of Tax Commissioners respectfully submits for your consideration, the following biennial report as required by law:

REVIEW OF TAX LEGISLATION OF OTHER STATES.

In compliance with the mandate of the statute and to better qualify themselves for the performance of their duties, the commissioners have carefully followed the tax and revenue legislation of other States, and have made extensive study of, and inquiry

concerning, the practical operation of methods of taxation in foreign jurisdictions.

The board has expended considerable effort to gather together and keep up to date, all the tax laws and official tax reports of all the States of the Union and the provinces of Canada.

Since our last report, two annual national tax conferences have been held under the auspices of the International Tax Association, the meeting of 1911 being held at Richmond, Virginia, and that of 1912 at Des Moines, Iowa.

These conferences annually bring together practically all of the tax commissioners of the various States of the Union, with numerous representatives of the leading universities and colleges of the country, together with many persons interested in the subject of taxation.

The object of these conferences is to promote uniformity and equality in taxation and the study of problems in taxation. The programs of these meetings cover such a wide variety of topics that it would be impracticable to give a review of them here, but some of the conclusions arrived at and recommendations made will be referred to later in this report.

NEW TAX LEGISLATION.

Notwithstanding taxation is co-existent with organized society, and is the oldest governmental problem, no system has ever been devised which is satisfactory. No two States of the Union have the same scheme for the raising of revenues, and in most instances there is such a diversity, even in fundamental principles, that there can be no comparison. The most noticeable thing about this is that no State seems to be satisfied with the system that it now has, and that innumerable new schemes are being proposed and adopted involving legislative and even constitutional changes.

While many of these new ideas possess more or less merit, the most of them simply change taxation statutes from a state of disorder to that of chaos. A large proportion contain the fundamental defect of lack of appreciation of the difference between theory and practice in taxation. Such a difference exists to a greater degree than in any other governmental function. This lack of practicability of schemes which are theoretically correct has driven many students of taxation to turn in despair to the Utopian dream of the single taxers.

There has been a growing tendency in recent years to get away from the general property tax as applied to personal property, and to substitute therefor excise, occupational, registry and specific taxes of an almost infinite variety. Other States have sought a remedy in centralizing power and authority in State boards, so that assessments would not be influenced or controlled by local influences.

OHIO'S NEW TAX LAW.

The most notable tax legislation of the last two years has been that of the State of Ohio. Contrary to the weight of present day authority, Ohio determined to retain the general property tax upon personal property, thereby incurring criticism which time only can demonstrate whether it is well founded.

The new Ohio law is similar to our law in many respects. A State board of tax commissioners, with wide powers was created. The most notable features of the law are the provisions requiring the assessment of all property at its true cash value, and the limiting of the tax levy for all purposes to one per centum. Under these provisions assessment values were tremendously increased, the assessment of real estate being raised from \$1,656,944,631 in 1910, to \$4,223,138,080 in 1911, while railroads were increased from \$167,453,818 in 1910, to \$571,281,620 in 1911.

The commission is also given jurisdiction to assess all banks and public utility companies.

TAXATION OF MONEYS AND CREDITS.

Minnesota, Michigan, Iowa, New York and other States have sought to solve the problem of the taxation of money and credits by either a low annual rate, or by a specific tax. The New York law, known as the "secured debt" law, charging a registry tax of five mills on bonds and securities and exempting them from further taxation. In Iowa, moneys and credits are placed in a special class and taxed at a uniform rate of five mills, while Minnesota has a similar tax of three mills, excepting upon mortgages and State and municipal bonds.

New Hampshire exempts money loaned at not exceeding five per cent., and secured by mortgage on real estate within the State.

Wisconsin has an income tax law carrying with it exemption of money and credits, stocks, household furniture and farm machinery. This law has been bitterly assailed and was the leading

State issue in the recent campaign. No tax legislation of recent years has aroused greater criticism and opposition.

New Jersey has enacted a great deal of advanced legislation, practically remodeling its system of raising revenues. It amended its inheritance tax law in important particulars. There was also enacted a law supplementary to the "Forest Reserve" law of 1907, providing that the owners of fresh water lakes subject to acquisition by the State may grant free access to and free use of the waters of such lakes and thereby have such land exempted from taxation.

The Senate and General Assembly of New Jersey also passed a joint resolution providing for the appointment of a commission of five members to investigate the present tax laws and to recommend changes if found desirable.

Oklahoma has abolished township assessors and substituted therefor county assessors, whose compensation is graded according to the amount of the property he assesses, and from which compensation he must pay his deputies. The county commissioners are made a board of equalization with the county assessor as its secretary.

In North Carolina the corporation (tax) commission has been given authority to appoint the county assessors.

New Hampshire created a State tax commission in 1911, the members to be appointed by the Supreme Court and having terms of six years. The powers and duties of said commission are similar to those of the commission of this State.

Rhode Island created a State tax commission in 1912, investing it with jurisdiction to assess public utility, manufacturing, mercantile and other corporations, providing for a system of assessment of the corporate excess of such corporations, except banking corporations, by the State tax commission, and the assessment locally of their real estate and tangible personal property.

Bank stock, excepting savings banks, is to be assessed by the State tax commission and taxed at the uniform rate of forty cents for each \$100 of such assessed valuation, being the same rate as other moneyed capital in the hands of individual citizens is assessed.

The law further provides for the taxation of the gross earnings of steamboat, ferry boat, steam railroads, street railways, dining, sleeping and parlor car; gas, electricity and water companies, of one per centum; telegraph and telephone companies at two per centum; express companies at three per centum.

TAX COMMISSIONS.

It will be noticed that the tendency of modern legislation is strongly toward centralized control of the administration of the revenue system.

Twenty-four States now have permanent tax commissions, while a number of other States have special tax commissions which will no doubt ultimately be made permanent.

Much of the new legislation is along the line of broadening the powers of tax commissions, increasing their jurisdiction as original boards of assessment, and giving them greater control over local administrative officers.

Nothing approaching uniformity of assessment can be attained under any system of taxation depending upon the discretion, integrity or efficiency of local assessing officials, unless there is some State official or board with broad enough supervisory powers to compel uniform assessments in the first instance, or to review and correct them after they have been made.

The language of the Indiana statute enjoins upon the State Board of Tax Commissioners the duty "to see that all assessments of property in this State are made according to law," but this is merely declaratory, and as a matter of fact the board is saddled with a duty without the means of performing it.

UNIFORMITY OF ASSESSMENT.

The constitution requires that "The General Assembly shall provide, by law, for a uniform and equal rate of assessment and taxation," and the General Assembly has directed that all property shall be assessed at its true cash value. For the purpose of enabling the State Board to enforce equality of assessments among the different counties, it is vested with authority to increase or decrease the assessment of property by classes only, the classes being railroad property, lands, town and city lots and personal property. The class denominated "personal property" includes an immense variety of taxable property such as merchandise stocks, manufactories, banks, moneys, secured and unsecured debts, farm products and machinery, household goods, etc.

It may well happen, and in actual practice does happen, every year, that there is a shocking lack of uniformity in the assessment of various items of personal property in the same county, and between the same items of personal property as between different counties.

Under the law the State Board has no way of correcting such inequality. The only thing that it can do is to increase or decrease the valuation of the entire class denominated personal property, thus perpetuating the ratio of disparity.

A good example of this evil is the assessment of banks, and we take banks as an example not because they suffer more than other kinds of property, but because they furnish, perhaps, the most conspicuous illustration of this kind of discrimination.

The State directs that bank stocks shall be assessed by the boards of review to the owner at the situs of the bank. The board of review of one county may assess the bank stocks of that county at 60 per cent. of their market value, while the board of review of an adjoining county may assess the bank stocks of that county at 85 per cent. of their market value. As a matter of fact the stocks of banks in this State are assessed at rates varying from 60 per cent. to 85 per cent., notwithstanding the most strenuous efforts of the State Board to bring about some degree of uniformity.

As this board can only increase or decrease the assessment of all personal property as a class, it follows that a large number of people justly assessed would be obliged to share the penalty of a few who were enjoying an unfair discrimination. Further than that an attempt to equalize would in some instances lead to a ridiculous result. It has actually happened that moneys and credits have been assessed at one hundred cents on the dollar, while bank stocks have been assessed at 65 per cent. of the cash value. In such a case, in order to reach the bank stocks it would be necessary to assess moneys at more than their face value.

As we have said banks are here used as an illustration because they are conspicuous and not because they are enjoying an unjust rate of assessment. We believe that banks should be assessed by the State Board, thus insuring a uniform and fair assessment.

Nearly all of the recent laws creating tax commissions in other States have empowered the State Board to order a reassessment in townships and counties where glaring inequalities exist, and some of such statutes authorize the State Board to equalize by individual classes of personal property. The proposition discussed here is a highly important one because it not only unjustly distributes the burden of taxation, upon different owners of the same class of property, but because it breeds contempt and disgust for laws which are so weak and impotent that they cannot enforce equality, even where there is no question of judgment or discretion involved, but only a question of simple addition and subtraction.

ASSESSING AT TRUE CASH VALUE.

The difficulties attending the attempt at uniformity of assessment are infinitely increased by the general disregard of the mandate of the statute, repeated in many places, that all property shall be assessed at its true cash value. Even statutes making it a criminal offense for a property owner to give in a false list, or for an assessing officer to assess at other than the true cash value have no terror for the one or the other. The property owner feels that through no fault of his he is compelled to choose between perjury and confiscation and he more or less cheerfully chooses that which he thinks has become right by custom.

When the present law was enacted in 1891, its author, a distinguished jurist yet living, intended that property should be assessed at its actual cash value, but adequate administrative machinery had not then been provided and the only chance to enforce the law, as written, was lost with the first assessment.

In the intervening twenty years, the State and its various taxing divisions, have adjusted their fiscal affairs to fit the present method of assessment, and without radical legislative changes it would be disastrous, at this time, to attempt to enforce full valuation. The sudden increase of 100 per cent. in the debt incurring power of municipalities, would result in such extravagance and disarrangement of financial affairs that the State might not recover in a generation.

Other States which are attempting to enforce full valuation provide safeguards in the way of a limited tax levy, as in Ohio, or spread the levy upon a minor percentage of the assessment returns as in Illinois.

THE GENERAL PROPERTY TAX.

The general property tax without full valuation is like a ship without a rudder. When it is left to the discretion of each individual assessing officer, as to what percentage of its full value he will assess various items of property, there will be as many kinds of assessments as there are assessing officers. Under our constitution, it is doubtful if any substitute could be adopted for the general property tax. Thirty-three States still retain this *ad valorem* system, but it is being abandoned as rapidly as constitutional amendments can be made, and it is well to keep it in mind so that the whole subject may be treated intelligently and effectively as soon as possible.

ADMINISTRATION OF TAX LAWS.

While our system is regarded as archaic, it is one of the best of its kind. As before noted the inherent defect of such a system is the difficulty arising out of its administration. That no administrative machinery can be devised which will cure this defect is the unanimous judgment of practically every economist and tax expert who has ever expressed an opinion on the subject.

This difficulty becomes more pronounced as financial and industrial conditions become more complex. Property owners sequester their personal property to a large extent. One thousand and seventeen township assessors have one thousand and seventeen different ideas of values, and in addition, each township assessor feels under obligation to see that his constituents are not over assessed, as compared with the constituents of other township assessors.

County boards of review are suspicious of each other and each seeks to keep the assessment of its county as low as the neighboring counties. With all of these conflicting influences, the wonder is that we get as fair an assessment as we do, and we wish here to acknowledge our appreciation of the services of township and county assessors and boards of review, as being a great deal better than the State has any right to expect considering the meagre salaries paid, the time within which the work must be done, and the temptation and influences to which assessors are always subjected.

Since the act was passed establishing the office of county assessor, there has been a marked improvement in uniformity of assessments and the sequestering of property has been made more hazardous and difficult.

During the year 1911, the various county assessors of the State discovered and placed upon the tax duplicates the enormous total of \$12,621,906.50 worth of sequestered personal property. We cannot commend too highly the efficiency of the present county assessors. They form the connecting link between the State Tax Board and the township assessors and boards of review.

Believing, as we do, that under the present system the fair and equitable distribution of the burden of taxes depends largely upon the efficiency of the administrative machinery, this board is endeavoring to secure coöperation among assessors by frequent conferences.

In January of each year, a meeting of all the county assessors is held at the capitol at which the work of the previous year is reviewed and work of the coming year is mapped out. Immediately afterwards district meetings are held where local conditions are more closely studied, and after the district meetings, county meetings are held at which all township assessors are expected to attend and at which a member of the State Board and the county assessor are present and instruct the township assessors in their duties.

MARION COUNTY.

In some counties it has been demonstrated that the present machinery is inadequate to do the work required by law. Under the Act of 1903, p. 49, the Board of Review of Marion County, is in session forty-five days. It is the duty of that board to assess all corporations except those assessed by the State Tax Board; to pass upon mortgage exemptions; to equalize all classes of property as between the various townships; add omitted property; hear appeals from assessments by township assessors and correct all errors in the names of persons and descriptions of property.

The number of corporations in Marion County is so large that it is necessary for the Board of Review to hear evidence, examine and assess on an average of eighty corporations a day during the entire session of the board, in addition to passing upon 13,000 mortgage exemptions, hearing appeals and equalizing assessments.

It needs no argument to convince one that the performance of such an amount of work in the manner contemplated by law, is an impossibility. As the Board of Review cannot begin its work until the assessing season is over and must finish its work in time for the State Tax Board to hear appeals and equalize in July, it is evident that the session of the board cannot be extended.

It has been suggested by the county assessor and auditor of Marion County, that a law providing that the two appointive members of the board shall begin their duties January 1st of each year, whose duty it shall be to gather information by personal investigation and otherwise, of such matters as come under the jurisdiction of the board and prepare the same for the use of the board upon its convening, would, in a measure at least, aid the board in dispatching its business with intelligence and some degree of accuracy.

LAKE COUNTY.

Under the act of 1911, p. 305, assessors in townships having a population of more than 5,000 and less than 20,000, receive \$200 per year and \$25 per year additional for each thousand up to 20,000, while assessors in townships having a population of more than 20,000 and less than 75,000 receive not less than \$800 nor more than \$1,500 a year, the amount to be determined by the board of commissioners. Populations to be reckoned according to the last census.

According to the census of 1910, Calumet Township, Lake County, which contains the city of Gary, had a population of 17,982 and Gary had a population of 16,802. Since that census was taken it is a matter of common knowledge that Gary has made tremendous strides in population and material wealth. Owing to its rapid growth, the frequent platting of new additions, the multiplication of business enterprises and the presence of some of the greatest manufacturing institutions in the world, a full and fair assessment would be a work of great difficulty and requiring the highest integrity and ability under the most favorable circumstances.

As shown by the assessment abstract of 1912, Gary has nearly 27,000 lots and over \$16,000,000 of taxable property, exclusive of the assessments made by the State Tax Board. Gary is remote from Crown Point, the county seat, and as a consequence the local assessor is burdened with multitudinous complaints and inquiries the year round. He receives under the present law, the munificent salary of \$500 a year. He would be underpaid at \$1,500.

5

INHERITANCE TAX.

We earnestly recommend the enactment of an inheritance tax law. All but ten States of the Union now have such a law. Of all revenue producing laws it is the least burdensome because the tax is not collected from the owner of property but is deducted in transit to him, and it is most just because it is not taken from the one creating the estate, but from those contributing little or nothing to its creation. With proper exemptions it works no hardships, but instead tends to equalize wealth and prevent swollen fortunes which are a menace to society and frequently injure those who inherit them.

Legislation upon this subject has now been worked out to a basis of abstract justice. Lack of interstate comity formerly

worked great injustice in some instances, but through the efforts of the National Tax Association, a model inheritance tax law has been worked out and forms the basis of many of the laws now in existence.

We recommend this law as a model or basis for any law upon the subject that you may enact.

This board has no data which would enable it to estimate the probable revenue to be derived from such a law, but from the experience of other States the income from such source adds materially to the revenues of the State.

EXEMPTIONS.

Notwithstanding the mandate of the constitution that all property shall be taxed, "exempting such only, for municipal, educational, literary, scientific, religious or charitable purposes, as may be specially exempted by law," there is at each session of the General Assembly a persistent effort made to secure exemptions either by direct legislation, or indirectly, by making the discovery and assessment of taxable property more difficult.

Of the first class are the exemption of Greek letter fraternities, municipal and gravel road bonds, mortgage indebtedness, members of fire companies from the payment of city or corporation taxes on \$500 worth of property, and of the second class are building and loan associations.

The mortgage exemptions in Marion County alone amounted to over \$6,500,000 in 1911. We have no statistics as to gravel road and municipal bonds, but the amount runs into the millions.

In 1911 (Acts 1911, p. 394), the General Assembly exempted building and loan associations as such from taxation and provided that the holders of shares of stock on which loans had not been made should be assessed thereon individually. This amounted practically to an exemption of the shares of stock, as no method was provided whereby assessors might ascertain who the owners of shares were, and the holders of such shares fail to list them for taxation.

As such associations have a combined capital of \$50,000,000 it can readily be seen it constitutes an important item of taxable property and greatly adds to the burden of the assessor in his efforts to make an honest and full assessment of property.

TAX LITIGATION.

Differences arising over the construction of the tax laws has caused some litigation since our last report. In 1911, the General Assembly amended the act concerning the assessment of express companies by the State Tax Board. The Adams Express Company, being dissatisfied with the assessment of this board, as made in 1912, applied to the United States Court of Appeals for an injunction restraining the collection of the assessment, but the law was upheld and the action of the board vindicated, and the application was denied.

In 1911, the Board of Review of Vanderburgh County, assessed The Peoples Savings Bank of Evansville, on cash in hand in the sum of \$21,000. Upon appeal to this board the action of the board of review was sustained and this board assessed the further sum of \$215,000 on surplus to said bank. The bank thereupon applied for and secured from the Circuit Court of Vanderburgh County a permanent injunction against the auditor and treasurer of said county, restraining them from attempting to collect the taxes on such assessment. An appeal was taken to the Appellate Court by the auditor and treasurer and such appeal is now pending. The point involved is an important one because the savings bank has a large amount of deposits, competes directly with other banks in Evansville, which pay taxes upon their capital stock, and yet claims to be exempt from taxation except upon its real estate.

COAL LANDS.

The assessment of coal lands has become the subject of a controversy which has assumed serious importance to what is known as the "coal group" of counties in the southwestern part of the State. In Board of Commissioners of Greene County v. Latta Creek Coal Company, decided by the Appellate Court, December 18, 1911, it was held that coal veins could not be assessed separately but constituted a part of the real estate. The Attorney-General appeared on behalf of the State and is now seeking to have the decision of the Appellate Court reviewed. The "coal" counties derive a large part of their revenues from the assessment of coal lands, and if the decision of the Appellate Court should be affirmed by the Supreme Court, there should be some new legislation at once to take care of the situation.

TERMS OF ASSESSORS.

Prior to 1911, the terms of county assessors and township assessors expired at alternate general elections, thus always retaining in office one or the other set of assessors, with at least two years' experience. In 1911 the General Assembly extended the terms of township assessors so that they would expire the first Monday in November, 1914. This makes the terms of both county and township assessors expire just before the quadrennial assessment of real estate, thus introducing new and inexperienced county assessors as well as township assessors at the beginning of the most important assessment of the four years period.

We do not see how this situation can be remedied except by the extension of the terms of county assessors, so that they will expire in 1916.

DELINQUENT TAXES.

The following comparative statement shows the amount of delinquent taxes for the four-year period ending January 1, 1912:

January 1, 1909.....	\$2,726,643 52
January 1, 1910.....	2,756,307 60
January 1, 1911.....	2,459,688 45
January 1, 1912.....	2,281,140 13

While there has been a decrease in each of the last two years, the board intends to give the subject a thorough investigation to ascertain what proportion of the amount so reported is collectible.

Section 10411 Burns R. S. 1908, provides that annually in November, before delinquencies of former years are carried upon the duplicate it shall be the duty of the auditor and treasurer to review and carefully examine the list of delinquencies, and to leave off all those which are uncollectible. This has not been done in many counties and as a result a large proportion of the amount of the delinquencies reported from year to year is composed of stale charges which only encumber the record.

STATEMENT OF TAXABLES.

In addition to the tables showing the total collection of taxes, abstracts of duplicates by counties and townships, appended hereto we also present herewith a comparative statement of the total taxables for the different classes of property for the years 1909, 1910, 1911 and 1912.

It will be noted that there has been but a slight increase in the personal property assessment from year to year. This is due largely to loss sustained on building and loan shares, municipal and gravel road bonds exempted by law, and loss on taxable farm products.

The taxable values of real estate and improvements are gross, and from the same must be deducted the mortgage exemptions which in 1911 amounted to \$58,547,355.

The statistics on exemptions for 1912 are not complete, but probably slightly exceed those for 1911.

The losses in taxables suffered by reason of various kinds of exemptions amount annually to an enormous sum, and demonstrate the necessity of strictly adhering to the constitutional mandate to assess all property, excepting only those mentioned which are exempted because of public policy.

	1908.	1909.	1910.

REPORT OF THE STATE BOARD OF TAX COMMISSIONERS.

THE STATE OF INDIANA,
EXECUTIVE DEPARTMENT,
December 11, 1916.

Received by the Governor, examined and referred to the Auditor of State for verification of the financial statement.

OFFICE OF AUDITOR OF STATE,
INDIANAPOLIS, December 11th, 1916.

The within report, so far as the same relates to moneys drawn from the State Treasury, has been examined and found correct.

OTTO L. KLAUSS,
Auditor of State.

December 11, 1916.

Returned by the Auditor of State, with above certificate, and transmitted to Secretary of State for publication, upon the order of the Board of Commissioners of Public Printing and Binding.

B. B. JOHNSON,
Secretary to the Governor.

Filed in the office of the Secretary of State of the State of Indiana, December 11th, 1916.

ED. JACKSON,
Secretary of State.

Received the within report and delivered to the printer December 11, 1916.

ED. D. DONNELL,
Clerk Printing Board.

DUTIES OF THE STATE BOARD OF TAX COMMISSIONERS.

(Acts 1891, p. 199, Section 178 Tax Laws.)

178. DUTIES OF STATE BOARD.

It shall be the duty of the State Board of Tax Commissioners:

First. To prescribe all forms of books and blanks used in the assessment and collection of taxes, and to change such forms when prescribed by law, in case any such change shall be necessary.

Second. To construe the tax and revenue laws of the State and instruct them in relation to their duties with reference to taxation and assessment, whenever requested to do so by any officer acting under any such law, or by any other person interested therein.

Third. To see that all assessments of property in this State are made according to law.

Fourth. Especially to see that all the railroads and other corporations of the State are assessed as provided by law.

Fifth. To see that all taxes due the State are collected.

Sixth. To enforce penalties prescribed by any revenue law of the State for disobedience of its provisions.

Seventh. To determine, whenever necessary, the amount required to be levied upon property in the several counties to cover any deficiency in the State revenue, not otherwise provided for.

Eighth. To examine all books, papers and accounts, and to interrogate under oath, or otherwise, all persons necessary to enable the board to acquire and obtain all information that could in any manner aid it in securing a compliance with the tax and revenue laws of the State by all persons or corporations liable for taxation, or to pay any license fee under any law in force in this State.

Ninth. To make such rules and regulations as the board shall deem proper to effectually carry out the purposes for which the board is constituted, and to make all necessary rules and reg-

ulations not inconsistent with law, as the board may deem necessary with respect to its own meetings and procedure.

Tenth. To report to the General Assembly, at each session, the whole amount of revenue collected in the State for all purposes, classifying as to State, county, township, and municipal purposes, with the sources thereof, the amount lost and causes of the loss, the proceedings of the board, and such other matters of information concerning the public revenues as they may deem of public interest.

Eleventh. To make diligent investigation and inquiry concerning the revenue laws and systems of other states and countries, as far as the same are made known by published reports, or statistics, or can be ascertained by correspondence with officers thereof, and with the aid of information thus obtained, together with experience and observation of our own laws, to recommend to the General Assembly at each session thereof, such amendments, changes or modifications of our revenue laws as seem proper or necessary to remedy injustice or irregularity in taxation, or to facilitate the assessment and collection of public revenues.

Twelfth. To see that each county in the State be visited by at least one member of the board, as often as once each year, to the end that complaints concerning the law may be heard, and that information concerning its workings may be collected. That all revenue officers comply with the law, and all violations thereof be punished, and that all proper suggestions as to amendments and changes may be made. (3 Burns' R. S. 1908, Sec. 10291.)

OFFICE OF THE STATE BOARD OF TAX COMMISSIONERS,

INDIANAPOLIS, December 11, 1916.

To the Seventieth General Assembly of the State of Indiana:

The State Board of Tax Commissioners respectfully submits for your consideration, the following biennial report as required by law:

REVIEW OF TAX LEGISLATION OF OTHER STATES.

In compliance with the mandate of the statute and to better qualify themselves for the performance of their duties, the commissioners have carefully followed the tax and revenue legislation of other states, and have made extensive study of, and in-

quiry concerning the practical operation of methods of taxation in foreign jurisdictions.

The general property tax system is included partially or wholly in the statutes of all states, generally being employed in the assessment of real estate and some of the intangibles. Where constitutions have been sufficiently liberal, classified and income features have been adopted, applicable most specifically to personal intangibles. New York is notably most advanced in the fixing of a statutory low rate on secured debts, notes, mortgages, etc. This new departure has increased the duplicate in that state very materially, but sequestration has not been eliminated. In Ohio where it has been persistently sought to have the classification tax incorporated into the fiscal laws, in a statewide vote, the proposition has been three times defeated, the last time by 300,000 plurality. In Minnesota the rates on the classification tax have been increased in order to meet public revenues, and an effort is to be extended making classification applicable to all classes of property. The income statute of Wisconsin continues to assert itself very satisfactorily to the taxpayers of that State. It was adopted with practical unanimity by the legislature and the electorate. Classification and income, the two theories now considered by economists as to the solution in some form of development of the tax problems of the country, are having the crucial test in Minnesota and Wisconsin, and the success wrought by experience and actual application will go far toward shaping the judgment of practical taxing officials as to which system, if either, most nearly approaches a substantial solution of this most vexing problem. In Indiana the popular objection is the feature of discrimination which operates against tangible property. The immediate necessity is one of administration. The present law, properly re-enforced, by amendments, can and will clarify the situation and bring relief. The recommendation of this board is to limit the tax levy for all purposes to some specific maximum, ample provision always being made for schools and present bond issues. No excess of maximum levy for any public improvements shall be made unless authorized by vote of the electorate.

RECOMMENDATIONS.

The state tax board respectfully suggests amendments to existing statutes as follows:

A non-partisan tax board, with powers of re-assessment;

equalization by classes; the assessment of domestic public utilities, the Public Service Commission, on request of the tax board, for the purpose of arriving at values of any such utilities, to furnish necessary information either from the records or special reports of its engineers; township assessors subordinate to the county assessors and both appointive and under the jurisdiction of the state tax board.

There is much agitation as to remedial agencies through constitutional amendments, but these if adopted by the General Assembly would require an affirmative popular vote, which spells delay. The board would also recommend that a substantial increase be made in the salaries of county assessors and also in the per diem of township assessors. These assessors, as a rule, are conscientious and hard-working officers, but their remuneration is entirely too low.

The suggestions as above recited will apply, if enacted into statute, to any system of taxation, and make administration more certain; indeed, administration is the factor of greatest reliance for the faithful execution of any statute. These recommendations are from the practical side of the situation as it exists in the State. When incorporated into law, after being whipped into shape by well considered legislative judgment, they will double the present duplicate, substantially reduce the levies, and give a more just measure of valuations and equalization.

EXEMPTIONS.

The Constitution specifically names the six classes of property that may be exempt, and the courts have uniformly held that the present statute must be strictly construed. In spite of these restrictions by legislative enactment and unwarranted constructions of the law by minor taxing officials, millions of dollars are exempted from the duplicate. On appeal to the state tax board many of these erroneous conclusions would be reversed, as they are without warrant of law, but in the absence of appeal the wrong is continued from year to year. Fraternal exemptions by legislative action, continues to be far reaching, and the amendments heretofore adopted by which these exemptions are made possible, should all be judicially reviewed with a view to the repeal of those not within the letter and spirit of the Constitution. It is safe to say that five hundred millions of dollars, when questionable tax exempt securities are considered, now escape from the duplicates.

The State Tax Board is cognizant of the existence of a legislative commission which is to report on taxation, and which has given a thorough and exhaustive examination of conditions in the State as same affects the subject of taxation. This board does not have a knowledge of the character of the report the commission will make, but believes that the information contained in its report and the recommendations suggested therein will be of a very helpful nature. For this reason the state tax board will not make extended recommendations along other lines than those of administration, but insists that the measures that have been suggested will go very far toward relieving the manifest inequalities of assessment and give relief from excessive tax levies.

Each session of the legislature seems to be burdened with increased demands for the exemption from taxation of certain and new classes of taxable property. Already the amount that is non-taxable under the law has grown to very large dimensions. Mortgage exemptions have increased until they were \$69,664,010 in 1915. Tax exempt gravel road, county and municipal bonds are estimated to be over \$61,400,000 and are constantly increasing. In 1911 the General Assembly exempted building and loan associations as such from taxation and provided that the holders of shares of stock on which loans have been made should be assessed thereon individually. The impossibility of securing information in order that this part of the law be successfully carried out renders this practically a dead letter, as no method was provided whereby assessors might ascertain who the holders of such shares were, and practically none is listed for taxation by the holder. The combined capital of the various associations is probably now in excess of \$63,000,000.

DELINQUENT TAXES.

Since the year 1911 there has been a substantial decrease in the amount of delinquent taxes. Appended below is a table showing the changes for the several years:

January 1, 1911, Delinquent Tax.....	\$2,459,688.45
January 1, 1912, Delinquent Tax.....	2,281,140.13
January 1, 1913, Delinquent Tax.....	2,393,150.73
January 1, 1914, Delinquent Tax.....	2,212,706.96
January 1, 1915, Delinquent Tax....	2,257,560.63

Section 10411, Burns' Revised Statutes, 1914, provides that annually in November before delinquencies of former years are

carried on the duplicate, it shall be the duty of the auditor and treasurer of each county to review and carefully examine the list of delinquencies and to leave off all those which are uncollectible.

This is now being done in practically every county and as a result a large amount of these delinquent taxes are dropped from the duplicate each year and carried to the insolvent record. The dropped-tax in Indiana amounts to approximately \$1,000,000 yearly. The present law, in relation to collection of delinquent taxes, seems to be inadequate and not sufficient to secure satisfactory results. The treasurer's books should show that he had made personal demands for payment of the tax and give a reason why each individual delinquent tax was not collectible. The state tax board sent the following letter to the auditor of each county of the State:

"The State Board of Tax Commissioners is required to look after the collection of all taxes, and to this end has prepared the necessary blanks for reports from the different counties by townships as to delinquent taxes, and will hereafter require from you as auditor annual reports as the records may show covering delinquent tax carried to insolvent record, delinquent tax collected, per cent of delinquent tax collected, per cent of delinquent tax carried to insolvent record, per cent of delinquent tax remaining on tax duplicate, with a blank space for remarks, if any.

"This first report should be made out as of January 1, 1916. Two blanks have this day been forwarded you, the extra one to provide against any accident to or error in making out the sheet for this office. This report should be made out and returned to the office of the State Board of Tax Commissioners on or before December 1st as it should be in its hands not later than that date."

These reports are being made into a permanent record and will be kept for reference in the office of the state tax board.

STATEMENT OF TAXABLES.

In addition to the table showing the total collection of taxes, abstract of duplicate by counties and townships, and rate for taxation in each, appended hereto, we also present for your consideration a comparative statement of the total taxables for the different classes of property for the years 1910, 1911, 1912, 1913, 1914 and 1915 as follows:

	1910	1911	1912
Lands and lots.....	\$785,757,773	\$851,575,288	\$868,699,687
Improvements.....	387,233,211	392,960,325	413,624,127
Personal property....	429,071,910	459,386,163	416,876,113
Steam railroads.....	196,941,375	202,476,540	204,516,876
Electric railroads....	22,376,238	23,524,951	24,703,253
Telephones.....	11,146,832	12,317,536	13,434,021
Telegraph.....	2,889,968	3,197,381	3,312,474
Express.....	1,731,808	1,330,655	1,382,645
Pipe lines.....	10,753,338	10,540,174	10,177,380
Transportation.....	892,400	1,117,154	1,255,643
Sleeping car.....	1,030,936	1,192,153	1,237,959
Totals.....	\$1,849,825,789	\$1,959,618,320	\$1,959,220,178

	1913	1914	1915
Lands and lots.....	\$875,769,317	\$852,773,450	\$912,571,722
Improvements.....	426,769,520	438,776,395	452,209,208
Personal property....	436,093,931	471,459,870	481,445,006
Steam railroads.....	205,771,788	208,941,570	212,121,242
Electric railroads....	25,701,134	27,173,747	26,965,732
Telephones.....	14,768,416	15,840,115	17,109,153
Telegraph.....	3,310,198	3,336,178	3,495,568
Express.....	1,218,672	824,044	1,002,480
Pipe lines.....	10,183,779	10,818,843	11,189,439
Transportation.....	1,564,760	1,618,075	1,442,750
Sleeping car.....	1,308,803	1,350,372	1,390,920
Totals.....	\$2,002,460,318	\$2,032,912,659	\$2,120,943,320

It will be noted that there is a very substantial increase in the valuation of personal property in the years 1914 and 1915 over the other years herein shown. This is due to the increase in the number and the price of live stock and cereals, and not to intangible personal property.

With the increasing growth of non-taxable securities there is a constant decline in the amount of moneys and notes and mortgages listed for taxation, the excessive tax rates in many localities causing the people that have money to invest in non-taxables. The taxable values of real estate as given in the table above are gross, from which must be deducted mortgage exemptions which has grown to the enormous amount of \$69,664,010 for the year 1915; showing an advance of \$7,115,858 since 1913, in which year the mortgage exemption was \$62,548,152.

We also call attention to the amount of money raised for taxation purposes for the year 1915, with the various funds to which these taxes are apportioned.

*Total Collection of All Taxes by Funds for June and December
Settlements for 1915.*

State tax, general fund.....	\$1,527,601.84
Benevolent institution tax.....	1,970,580.99
State debt sinking fund.....	295,598.37
State school tax.....	2,857,269.12
State educational fund.....	1,379,389.94
State vocational educational fund.....	197,256.28
County fund.....	6,562,737.77
Township tax.....	1,291,311.41
Tuition tax.....	5,064,149.17
Special school tax.....	6,257,506.03
Road tax.....	1,334,078.44
Relief of poor tax.....	368,567.15
Gravel road repair tax.....	2,054,405.93
Gravel and macadam road tax.....	6,232,894.88
Library tax.....	417,373.82
Miscellaneous tax.....	13,018,051.63
<hr/>	
Total.....	\$50,828,772.77

THE INHERITANCE TAX.

Since our last biennial report we have had ample time to observe the splendid work that has been done by Mr. Albert E. Humke, the Inheritance Tax Investigator. Mr. Humke has had charge of this work since the law went into effect. He has studied this law very carefully and has become so familiar with it that the state tax board would favor any changes in the law that he might see fit to suggest; therefore the board wishes to submit the following:

The inheritance tax law, enacted by the General Assembly in 1913, effective May 1, 1913, has been in operation nearly four years, and has become, by efficient management, a very productive and reliable source of revenue to the State. It is no longer an experiment, but an established fact in the system of taxation. Like the income tax, it has the endorsement of the leading economists of ancient and modern times, and is universally recognized as a just and equitable method of providing for the support of government. The Indiana law is thoroughly modern in all its principal and essential features. It is not perfect, but with a few amendments of minor importance it can easily be made into a model law

The following table shows the amounts of revenue, quarterly since the enactment of the law, as per orders of the several courts passing on inheritance tax matters, and shown in the quarterly reports of the Inheritance Tax Investigator to the State Tax Board:

January 1, 1914	\$40,642.49	
April 1, 1914.....	31,059.26	
July 1, 1914.....	78,199.70	
October 1, 1914.....	41,802.99	
	<hr/>	\$191,704.44
January 1, 1915.....	\$75,760.62	
April 1, 1915.....	83,964.06	
July 1, 1915.....	98,308.10	
October 1, 1915.....	52,474.46	
	<hr/>	\$300,507.24
January 1, 1916	\$83,203.96	
April 1, 1916.....	100,411.07	
July 1, 1916.....	86,143.03	
October 1, 1916.....	53,381.37	
	<hr/>	\$323,139.43
		<hr/>
		\$815,351.11

By an act of the last legislature the county assessors of the State became the official appraisers for inheritance tax purposes in their respective counties. This has proved to be a decided improvement and has given general satisfaction. It has enabled the investigator to simplify, unify and systematize the work, and secure a much higher degree of uniformity. By virtue of his office, the county assessor is the logical appraiser and is in the position of giving the State superior service. In all but a few of the ninety-two counties they have done their inheritance tax work faithfully, efficiently and satisfactorily, and have been fair, just and reasonable in their charges.

For the purpose of improving the law and thus rendering it more effective, the following changes or amendments are suggested and recommended by Mr. Humke:

1. Making stocks and bonds in Indiana corporations held by non-residents taxable.

It is believed that the location of the physical property should determine the place of taxation. This principle is now applied without question in the case of real estate, and should, we think, apply equally to all forms of tangible property. The certificates of stock are but the evidence of the ownership of the physical property. More and more real estate is passing into the ownership of corporations. Large tracts of land are held by land companies. In cities, corporations own many of the large and valuable buildings and business sites used for hotels, theaters, office buildings and mercantile blocks. All such property is now withdrawn from the purview of the inheritance tax unless it be held that the stock is Indiana property. These stocks in Indiana corporations are largely owned and held in the financial centers of the east and ought to be subject to the inheritance tax upon transfer at the death of the owner.

2. Changing the conjunction "and" to "or" before the word "intended" in subdivision 4, Section 1, and adding a clause to said subdivision making it a conclusive presumption that any conveyance by deed or otherwise without a valuable consideration within two years of the death of the grantor is made in contemplation of death.

3. Providing that descendants of a son or daughter, brother or sister, shall be allowed the exemption of their ancestor, per stirpes and not per capita.

4. Adding a paragraph to Section 4, providing that the exemption allowed by law shall be taken out of the first \$25,000 of the inheritance tax, and that the primary rates shall be assessed upon the difference between said \$25,000 and the exemption, and the rates as fixed in Section 3 assessed on any excess over and above the said \$25,000. This paragraph should be added to avoid any question as to the manner of calculating the tax.

5. Amending Section 13 to conform to the present law making the county assessor the official appraiser of all estates subject to the tax, and adding to said section a clause requiring all executors or administrators to file with the appraiser a complete schedule of all the property, both real and personal, of which the decedent died, seized or possessed, and also an itemized statement of the indebtedness.

6. Adding to subdivision 1, Section 13, the provision that no estates which are not subject to the tax shall be appraised at the expense of the State.

7. Striking out of section 21, the words "upon the payment of the sum of fifty cents" and the last sentence of said section.

8. Amending section 16 by fixing the fee of the prosecuting attorney in estates which have not come into court and in which his services are required.

9. Adding a provision by which an appeal may be taken by the State Tax Commission or the Auditor of State from the decision of the Circuit, Probate or Superior Courts.

In concluding this report, the State Tax Commission feels that it should voice its thanks for the assistance rendered to it by the Public Service Commission. The information in its hands has always been freely at our disposal and of most material assistance in determining values in many cases.

ABSTRACT OF TAX DUPLICATE FOR 1915.

Showing the Total Taxable Property of the State, Real and Personal Including Railroad and Other Corporate Property, Together with the Amount of Taxes Levied Thereon for State and Local Purposes, and also the Number of Taxable Polls in the Several Counties of the State, for the Year 1915.
